

ALTIORA

Personal Career Guidance Report

Student: Test User

Date: 09/09/2026

Academic Stream: Science

A personalized career guidance report based on your academic profile and assessment responses.

Section 1: Your Profile

Name: Test User

Age: 18

Location: Test District, Test State

Section 2: Academic Profile

Class 10 Percentage: 90%

Class 12 Percentage: 96.3%

Stream: Science

Electives: Computer Science

Academic Performance

Computer_ Science		100.0%
Maths		98.0%
Physics		95.0%
Chemistry		92.0%

Section 3: Assessment Overview

You completed 2 assessment questions.

This assessment measures key traits and interests to align your profile with the best-fitting career domains.

Key Strengths Identified:

- **Analytical Thinking**

Strong logic skills

Section 4: Your Career Recommendation

Technology & Computing

Confidence: High

Probability Match: 85.0%

The ALTIORA model identified Technology & Computing as the strongest career-domain match based on the academic profile and assessment responses you provided.

Top Predicted Domains

Section 5: Why ALTIORA Recommended This

ALTIORA analyzes your complete profile. Here are the key factors driving this recommendation:

- Analytical Thinking: Strong logic skills

Section 6: How ALTIORA Works

ALTIORA combines your academic information with your career assessment responses to identify the career domain that best matches your overall profile.

The system uses a trained Random Forest machine-learning model. It combines the decisions of many decision trees to identify patterns associated with different career domains, matching your traits to historical successful profiles.

Section 7: Recommended Courses

1. B.Tech CS

Domain: Tech

- High Math

Section 8: Recommended Colleges

College information can change. Please verify current fees, admission requirements, course availability and deadlines through the institution's official sources before applying.

College	Course	Location	Type
Test College	N/A		Private

Section 9: What You Can Do Next

1. Explore the recommended courses

Learn what each course covers and what kinds of careers it can lead to.

2. Compare colleges

Check current admission requirements, fees, location and course availability.

3. Build relevant skills

Identify beginner-friendly skills related to Technology & Computing.

4. Keep your options open

ALTIORA provides guidance, not a fixed career decision. Compare the recommendations with your interests, goals and circumstances.

5. Verify before applying

Always check official college/course information before making admission decisions.

Limitations & Scope

- ALTIORA provides guidance rather than a guaranteed career outcome.
- Predictions depend on the information supplied by the student.
- The model does not determine a student's future.
- Course and college information can change. Independently verify admission information.
- Current model scope: Science and Commerce students. Arts/Humanities is not currently supported.

Future Scope

Future versions of ALTIORA could expand the training dataset and prediction system to support Arts and Humanities students using representative data and relevant subjects such as History, Political Science, Sociology and Geography.
